Autodesk Student Expert Program

Autodesk, Inc.

Hello,

The Student Expert program is an opportunity for select students to not only get hands-on software training with Autodesk and industry experts, but also to hone their leadership skills in preparation for their careers as design professionals. The Student Expert Program extends throughout the year, with the Student Experts becoming resources for their peers on campus. They will:

- Facilitate workshops with the assistance of Autodesk Solution Specialists
- Be a point of contact for peer-to-peer training
- Host on-going mentoring and discussion meetings for other students also excited to become proficient in using tools used by the professionals in their fields
- Work directly with Autodesk Solutions Specialist and marketing team
- Mentor and work with Student Rep (ideally a Freshman or Sophomore)

Many Thanks,

Michael Leone

YOUR WORLD

Autodesk®

Student Expert Program: 2011-2012 Academic Year

Select students at top design and engineering schools are chosen to represent Autodesk on their respective campuses. Experts conduct learning and knowledge-sharing activities on a monthly basis, such as hosting workshops and training sessions, with the support of an Autodesk Student Evangelist (someone who has been an Expert for at least 1 year and has been promoted by the Autodesk team) and Autodesk Solutions Specialist.

Overview:

- A volunteer based program with the opportunity for students to gain real world experiences and leadership skills
- Student Experts are supported by a team of people: Student Evangelist, Solutions Specialist, Education Marketing Manager and Campus Manager
- Student Experts supported by the above mentioned team, will receive training, mentorship, regular discussions
- Requires students to attend virtual meetings with their assigned Autodesk team to check-in, share campus insights, and get updates on Autodesk software, trends and continued learning

Benefits to the Student Expert & Their Peers on Campus:

- Achieve product expertise, become leaders on campus, develop career networking skills, and gain resume building experiences with the Autodesk brand
- Become skilled in using the design software used by industry professionals in their respective disciplines
- Be exposed to current industry trends, such as Sustainable Design, Building Information Modeling, and Digital Prototyping
- Provided access to training materials and resources to share with faculty and peers on campus
- Students will have the opportunity to become certified in our software
- Student Experts will hear about internship opportunities at Autodesk, before they are announced to the general public
- Exposure to networking opportunities with industry professionals and Autodesk executives
